CHANGE THE WAY YOU DRIVE

With Pioneer navigation in your car, you can experience the road like never before. More than simple navigation products, AVIC systems enhance your drive with a host of communication and entertainment possibilities. They are easy to use, fit smoothly in all types of cars and can be customized to suit your own taste. Explore. Talk. Play. With Pioneer navigation, it's that easy.

EXPLORE

Travel anywhere in North America with confidence. Pioneer X-Series navigation products come with pre-installed TeleAtlas maps of the United States and Canada. Navigation is made easy thanks to the large display, easy on-screen controls and text-to-speech (TTS) voice guidance. Leave the hard part of exploration to the system, and simply enjoy the adventure ahead.

TALK

Stay connected as you travel with Bluetooth® wireless technology. Pioneer navigation units come with a built-in Bluetooth® module from Parrot, allowing hands-free conversations on the road. Simple on-screen controls make it easy to manage your contacts and receive and make calls from behind the wheel. With Pioneer navigation, you'll always remain in touch, wherever you decide to go.

PLAY

Never be without your favorite music or video again. Pioneer X-Series navigation enables you to enjoy your music and video from your iPod®, USB devices and SD/SDHC card while controlling these sources directly on screen. Further expand your sources with HD Radio™ and Satellite Radio. No matter how long the journey is, you can keep yourself and your passengers entertained the whole way.

- Video ready! Play videos from your iPod® or AV source as well as rear view camera input.
- Play music from your iPod® or make a hands-free Bluetooth® phone call using the powerful Voice Control engine.
- Navigation features include updated map database, 2D heading up, highway sign boards and more.

AVIC-X7115BT

• Either "Made for iPod" or "Works with iPhone" means that an electronic accessory has been designed to connect specifically to iPod or iPhone and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety or regulatory standards. Operations and functions may vary depending on iPod models or headunits. Compatible iPod information is available at www.pioneer-electronics.com. Driver must not operate iPod using the Passenger Control Mode while driving. iPod and iPhone are registered trademarks of Apple Inc.

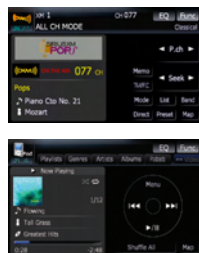

★ Bluetooth functionality requires a compatible Bluetooth-enabled mobile phone. Certain Bluetooth features may not be supported by all compatible Bluetooth-enabled devices, and/or the functionality of such features may be limited in certain devices or by certain wireless carriers. More details for compatible Bluetooth-enabled mobile phones are available at www.pioneer-electronics.com. Availability of voice command depends on availability of data extraction for iPod or Bluetooth-enabled mobile phone, functionality may vary and may be limited. The Bluetooth trademarks are owned by Bluetooth SIG, Inc.

◆ Not every USB device is compatible with a Pioneer headunit containing a USB port. More details are available at www.pioneer-electronics.com. Pioneer headunits containing a USB port are compatible with MSC (Mass Storage Class) and USB devices only, and are not compatible DRM (Digital Rights Management) contents and MTP (Media Transfer Protocol) connection devices. Unauthorized copying of music or other files is strictly prohibited. Optional USB extension cable is available for use with front USB ports.

NAVIGATION CONTROL
Destination entry (Address Search, POI selection by category or brand name)

NAVIGATION
The Pioneer X-Series is pre-installed with TeleAtlas maps so you can travel with confidence. Navigation is made easy with the 5.8" display, touch-screen controls and text-to-speech (TTS) voice guidance. You can even personalize your navigation experience with the Pioneer AVIC FEEDS freeware program, which brings in content from your computer and the Internet to the X-Series.

HANDS FREE DIAL
• Dial Phone Numbers by voice
• Call any contact in your phonebook and specify home, work, mobile

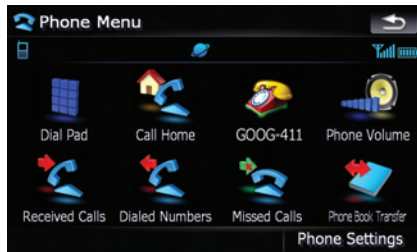

BLUETOOTH®
Enjoy easy hands-free calls with outstanding clarity using built-in Bluetooth® wireless technology. Simple on-screen controls make it easy to send and receive calls as well as manage your contacts. With voice control, you can make a call by saying the person's name or the phone number. Pair your Bluetooth® enabled mobile phone to the X-Series and stay in touch wherever you decide to go!

Bluetooth®

CONTROL YOUR IPOD® BY VOICE
Search by Artist, Album, Genre, or Playlist

CONTROL YOUR IPOD®.
Directly connect and charge your iPod® to the X-Series (CD-IU230V cable required). File search and access are extremely quick using USB 2.0, and the direct digital signal transfer provides clean, clear sound. Navigate your iPod® using your voice to search by artist, album, genre or playlist. Control your iPod® through the touch-screen and 7-way Rotary Commander.

Made for iPod

Note: Do not use your Pioneer navigation system if doing so will divert your attention in any way from the safe operation of your vehicle. Always observe safe driving rules. In some states certain operations of devices while driving may be illegal; where such regulations apply, they must be obeyed. To use Voice Control to access iPod® content, an iPod® must be connected, selected as the source, and remain in iPod® mode until cataloging is completed. Failure to catalog iPod® content may limit the use of Voice Control to access iPod® content. If music files stored on a USB device or SD card are played when the system is in Route Guidance Mode, the volume of the navigation guidance voice will be the same as the volume of the music files being played, even if a different "Master" or "Voice" or "Dynamic" volume has been selected in the "sound settings" menu.

IPOD® OPERABLE WITH HEADUNIT

MADE FOR

- iPod® with Video
